Michela Monterosso

UX Lead / Senior Product Designer

Stockholm, Sweden

ABOUT

I'm UX Lead / Senior Product Designer based in Stockholm with 15 years of experience across branding, interaction design, and product strategy. I started as a visual designer, retrained during my career, and have been leading UX work since. I bring a multi-disciplinary perspective shaped by working across cultures and industries. I specialise in complex digital products, turning ambiguity into clear UX direction.

EXPERIENCE HIGHLIGHTS

- Leading UX direction for complex digital products across multiple industries
- Turning ambiguous problem spaces into structured opportunities with a clear design direction
- Facilitating stakeholder workshops and presentations to create alignment and support decision-making
- Delivering UX work across discovery, concept, and delivery phases
- Bridging user needs, business priorities, and technical constraints across teams
- Contributing to developing the design competence area
- Supporting career development through coaching, feedback, and development talks

STRENGTHS

Chaos to structure
I thrive when things are complex. Tricky flows, edge cases, competing constraints are some of my favourite challenges.

Storytelling & coherence
I have a strong ability to tell the story behind the work, by connecting research, design choices, and product direction.

People to outcomes
I'm good at bringing people together across disciplines, facilitating the conversation, and making sure it leads somewhere concrete.

Deep domain empathy
I immerse myself fully in whatever field I'm designing for, learning the language and designing from the inside.

HONEST NOTES

Craft over coordination
I tend to lose my spark when I spend most of my time away from hands-on UX crafting. I need to stay close to design.

On AI
I enjoy my work because it makes me think, hard. Without challenges I wouldn't learn. I use AI cautiously.

Staying creative under pressure
When stress is high, I default to what's known and safe. I'm working on protecting my creativity even when things get tight.

Design systems
I understand component libraries, but deep token architecture isn't the kind of work I'm looking for anymore.

EXPERIENCE

UX Lead / Product Designer 2021 – Present · Stockholm
Framna

End-to-end UX across apps and websites — from research and user journeys through wireframes, interaction design, and content strategy. I also lead workshops, contribute to internal tooling, and collaborate closely with developers and clients throughout delivery.

CLIENTS: POSTNORD, ALLER MEDIA, PRAKTIKERTJÄNST

UX Designer 2019 – 2021 · Stockholm
Making Waves

Research, user journeys, wireframes, user flows, and content strategy for both apps and websites. Involved in building internal tools for the team and facilitating workshops with clients and stakeholders.
